These lived experiences are relevant to students and introduce themes that provide a framework for learning the chapter material. Kendall's vivid and inviting writing style, emphasis on applications, and eye for compelling current examples further highlight sociology's relevance to all students. Now in its eleventh edition, SOCIOLOGY IN OUR TIMES is acclaimed for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. This edition focuses more on social/global change and on the contemporary world, presenting such current debates as bullying and social media abuse, digital-age methods to increase school attendance, food trucks and the spread of culture, modern slavery, and weight bias. In this ground-breaking book, acclaimed sociologist Ann Oakley undertook one of the first serious sociological studies to examine women's work in the home. She interviewed 40 urban housewives and analysed their perceptions of housework, their feelings of monotony and fragmentation, the length of their working week, the importance of standards and routines, and their attitudes to different household tasks. Most women, irrespective of social class, were dissatisfied with housework – an important finding which contrasted with prevailing views. Importantly, too, she showed how the neglect of research on domestic work was linked to the inbuilt sexism of sociology. This classic book challenged the hitherto neglect of housework as a topic worthy of study and paved the way for the sociological study of many more aspects of women's lives.
