CHAPTER 4 Tissue: The Living Fabric

TISSUE is a group of cells having similar origin that work together to perform a specific function

Four major types of tissues

- o Epithelial
- o Connective
- o Muscle
- o Nervous

EPITHELIAL TISSUE

- o Widespread throughout the body
- o Composed almost entirely of cells
- o Form continuous sheets held together by tight junctions and desmosomes
- o Cells are mostly compact and tightly fitted together
- o Tissue forms lining of organs or body cavities
- o Supported by fibrous ...
