~~The Final Flight of Amelia EarhartCivil Air Patrol Amelia Earhart~~

Amelia Earhart was a record-setting aviator and one of the first female heroes of aviation. In 1928 she became the first woman to achieve a solo trans-Atlantic flight. Outside the cockpit, Earhart was a leading figure of public life, a celebrity "Queen of the Air," a proponent of equal rights for women, an eloquent writer, and one of the key organizers of the Ninety-Nines, an association of female aviators.

### Earhart Award | Civil Air Patrol National Headquarters

Earhart took her first flying lesson on January 3, 1921, and in six months managed to save enough money to buy her first plane. The second-hand Kinner Airater was a two-seater biplane painted bright yellow. Earhart named the plane "Canary," and used it to set her first women's record by rising to an altitude of 14,000 feet.

Smith via video conference Thursday evening. The Cadets and Senior Members had the opportunity to ask General Smith questions about his career, duties as the National Commander of Civil Air Patrol, and the future of Civil ...

Amelia Earhart's account of her ill-fated last flight around the world, begun in 1937, remains one of the most moving and absorbing adventure stories of all time. Last Flight compiles the letters, diary entries and charts that she sent to her husband, G.P. Putnam at each stage of her trip. In her own words, these dispatches offer a window into her experience on this ground-breaking journey and illustrate her cheerful, charming nature. Her story continues to intrigue and inspire people to this day.

"Where imagination takes flight!" --Page 1 of cover.

A booklet including a short text covering the life of Amelia Earhart with nine pages of 18 task cards covering the subjects of math, language, spelling, reading, values clarification, health, geography, science, art, and music.

When Amelia Earhart disappeared on July 2, 1937, she was flying the longest leg of her around-the-world flight and was only days away from completing her Journey. Her plane was never found, and for more than sixty years rumors have persisted about what happened to her. Now, with the recent discovery of long-lost radio messages from Earhart's final flight, we can say with confidence that she ran out of gas just short of her destination of Howland Island in the Pacific Ocean. From the beginning of her flight, a series of tragic circumstances all but doomed her and her navigator, Fred Noonan. Authors Elgen M. and Marie K. Long spent more than twenty-five years researching the mystery surrounding Earhart's final flight before finally determining what happened. They traveled over one hundred thousand miles to interview more than one hundred people who knew some part of the Earhart story. They draw on authoritative sources to take us inside the cockpit of the Electra plane that Earhart flew and recreate the final flight itself. Because Elgen Long began his own flying career not long after Earhart's disappearance, he can describe the equipment and conditions of the time with a vivid first-hand accuracy. As a result, this book brings to life the primitive conditions under which Earhart flew, in an era before radar, with unreliable communications, grass landing strips, and poorly mapped islands. Amelia Earhart: The Mystery Solved does more than just answer the question, What happened to Amelia Earhart? It reminds us how daring early aviators such as Earhart were as they risked their lives to push the technology of the day to its limits -- and beyond.

Word fun, math, international quizzes, and secret codes are included to teach elementary age students about Amelia Earhart's early life and later daring flights.
