Honda Engines | Owners Manuals

Net horsepower more closely correlates with the power the operator will experience when using a Honda engine powered product. The power rating of the engines indicated in this document measures the net power output at 3600 rpm (7000 rpm for model GXH50, GXV50, GX25 and GX35) and net torque at 2500 rpm, as tested on a production engine. ...

Make sure you're using the
correct starting procedure.
For example, the procedure
for starting a Homelite
UT80432, which uses a Honda
GVC190 engine, is to turn
the fuel valve on and pull
out the choke before pulling
the starting rope. Once the
engine is running, you must
push the choke back in or
the engine will sputter and
die.

Xr2600 - morganduke.org

To change the oil in your Honda engine, start it up and let it run long enough to warm the oil to ensure it will flow smoothly when drained. Turn the engine off, and place a shallow bucket or drain pan beneath the drain plug on the engine. Remove the drain plug and the oil filler cap to allow good oil flow, and allow the oil to drain into the pan.
