The study of gender and politics in political science rests on an initial body of research that established women as a politically relevant group for political scientific analysis and sex as a political variable. A small number of early influential studies of women and politics can be identified, the best known of which is Maurice Duverger ' s The Political Role of Women (1955), a work ...

The opening years of 1980 were difficult for Yugoslavia: Open revolt has occurred in Kosovo province and economic hardship has added to a general crisis of confidence. The system of self-management, once the pride of Yugoslav ideologists, has come increasingly under fire in post-Tito Yugoslavia as proponents of the system search for a new basis of

of the wives and women associated with nine distinct political thinkers—from Socrates to Marx—in order to explore the gendered patterns of intellectual labor that permeate the foundations of Western political thought. Organized chronologically and representative of three eras in the history of political thought (Ancient, Early Modern, and Modern), nine critical biographical chapters explore the everyday acts of intellectual labor and partnership involving these "wives of the canon." Taking seriously their narratives as intimate partners reveals that wives have labored in remarkable ways throughout the history of political thought. In some cases, their labors mark the conceptual boundaries of political life; in others, they serve as uncredited resources for the production of political ideas. In all instances, however, these wives and intimates are pushed to the margins of the history of political thought. The Wives of Western Philosophy brings these women to the

center of scholarly interest. In so doing, it provides new insights into the intellectual biographies of some of the most famed men in political theory while also raising important questions about the gendered politics of intellectual labor which shape our receptions of canonical texts and thinkers, and which sustain the academy even today.

Over the last two decades our understanding of the relationship of gender, politics and the state has been transformed almost beyond recognition by the mutual interrogation of feminism and political science. This volume provides an overview of this dynamic and growing field, which reflects both its expanding empirical scope and the accompanying theoretical development and debate. The first three essays focus primarily on conceptual and theoretical issues: the meaning of 'gender'; the state's role in the construction of gender

within the public and private sphere; and the political representation of gender differences within liberal democracy. The remaining six provide analyses of more concrete issues of state policy and participation in differing national political contexts: abortion politics in Ireland; the local politics of prostitution in Britain, the impact on women's political participation of economic change in China, Latin America and political change in Russia, and the gender impact of state programmes of land reform.

This timely collection offers a fresh look on the impact of gender perspectives in the discipline of political science at the beginning of the 21st century. Jane Bayes combats the Eurocentric focus that has characterised both fields and suggests viable alternatives for the future of the disciplines.

In the wake of communism's decline, women's concerns have become increasingly important in Eastern Europe and the former Soviet Union. The issue of abortion, for example, has been bitterly contested in virtually all the countries. Women's role in Eastern European societies has been central to the post-communist restructuring, yet most discussions of post-communist changes have neglected women's experiences. *Gender Politics and Post-Communism* is the first collection of its kind, presenting original essays by women scholars, politicians, activists, and former dissidents from Eastern Europe and the former Soviet Union. They discuss gender politics during the often turbulent transition and crises of post-communism, offering vivid accounts and analyses of the conditions facing women in each country. These essays provide the philosophical, economic, historical, cultural,

and sociological contexts needed to understand women's position and the possibilities for women's activities in post-communism. The book aims to provoke public discourse on the myriad issues facing women in the East, including nationalism, the economic transformation, women and the state, abortion, and sexuality. They expose the anti-feminism of state socialism and discuss what women have gained and lost with the fall of communism. They also ask whether Western feminism has any place in post-communist countries. The book includes controversial critiques of Western feminism by post-communist women as well as essays by Western feminists and scholars. Exploring misunderstandings between women in the East and West, the book will stimulate reflection on the global implications of feminist theories.

This book traces the interplay of class, gender, and politics in progressive-era Seattle, Washington during the formative period of industrialization and the establishment of a national market economy. With the rapid westward expansion of the capitalist marketplace by the dawn of the 20th century, national political and economic pressures significantly transformed both city and region. Despite the region's vast natural resources, the West had a highly urbanized population, surpassing even that of the industrial Northeast. Westerners celebrated the region's wide-open spaces, and even though a large part of the West's economy was centered in the mines, fields, and forests, most chose to live in the city. Cities thus witnessed the intersection of class, gender, and political reform as residents struggled to

regulations, ten more countries joined the European Union. The contributors to this volume assess the impact of this historical development on gender relations in the new and old EU member states. Instead of focusing on either western or eastern Europe, this book investigates the similarities and differences in diverse parts of Europe. Although initially limited, gender equality was part of the original framework of the European Union, an organization often more open than national governments to feminist demands, as this volume illustrates with case studies from eastern and western Europe. The enlargement process thus provides some important policy instruments for increasing equality between men and women.
