Commander's Intent. MCMAP is an integrated, weapons-based system that incorporates the full spectrum of the force continuum on the battlefield, and contributes to the mental, character and physical development of Marines. It is the intent that MCMAP enhances the transformation from civilian to Marine by capitalizing on the zeal of entry level training, and developing the Marine ethos in a progressive manner throughout a Marine's career. Concept of operations (a) All Marines, regardless of age, grade or sex must perform MCMAP qualifications. (b) Commanders shall conduct MCMAP training in accordance with the instructions contained. (e) The prescribed minimum requirements of this Order should not be interpreted as limiting the commander. Commanders are encouraged to conduct additional MCMAP training in a progressive, safe manner to enhance unit performance and fitness levels of Marines.

Jack Hoban delivers a revolutionary view of moral values for our time epitomized by the Ethical Warrior - protector of self and others as equal human beings. Hoban's methodology reaches from the Greek ancients to the counterinsurgency efforts of today's Marines to provide ethical clarity and confidence in our moral actions.

Although the technologies of war will always change, the insights of great leaders are timeless. And at no time are those lessons more important than in the heat of combat with lives on the line. The key is in preparation before a conflict. Battle Leadership helps you be prepared by teaching such essential skills as: How to handle different personalities under extreme stress. How to prepare your troops psychologically for combat. Insight into proven battlefield tactics (even if some of those tactics are only still relevant for their historical insights). How to instill confidence in those following you. While military tactics change, the wisdom of true leadership invariably holds. These lessons can even be applied to running a business, non-profit or government department, but they are crucial to every military commander or aspiring officer. Find out why when lives are on the line, generations have turned to and continue to learn from Battle Leadership.

Marine Corps Reference Publication (MCRP) 3-02B. Marine Corps Martial Arts Program (MCMAP), is designed for Marines to review and study techniques after receiving initial training from a certified Marine Corps martial arts instructor or martial arts instructor trainer. It is not designed as a self-study or independent course. The true value of Marine Corps Martial Arts Program is enhancement to unit training. A properly implemented program can help instill unit esprit de corps and help foster the mental, character, and physical development of the individual Marine in the unit. This publication guides individual Marines, leaders, and martial arts instructors/instructor trainers in the proper tactics, techniques, and procedures for martial arts training. MCRP 3-02B is not intended to replace supervision by appropriate

unit leaders and martial arts instruction by qualified instructors. Its role is to ensure standardized execution of tactics, techniques, and procedures throughout the Marine Corps. Although not directive, this publication is intended for use as a reference by all Marines in developing individual and unit martial arts programs. For policy on conducting martial arts training, refer to Marine Corps Order 1500.59, Marine Corps Martial Arts Program (MCMAP). **WARNING** Techniques described in this manual can cause serious injury or death. Practical application in the training of these techniques will be conducted in strict adherence with training procedures outlined in this manual as well as by conducting a thorough operational risk assessment for all training.

Marine Corps Warfighting Publication MCWP 6-10 (Formerly MCWP 6-11) Leading Marines 2 May 2016 The act of leading Marines is a sacred responsibility and a rewarding experience. This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation of Marine leaders.

PowerPivot is an amazing new add-in for Excel 2013 that allows business intelligence pros to process large amounts data. Although it is simple to use in a demo environment, analysts are likely to run into real-life scenarios that are difficult to solve. This guide, dedicated solely to the PowerPivot tool, provides techniques and solutions to real-world

problems, including showing the Top N customers by using slicer filters, comparing budget to actuals, drilling across data instead of through data, and joining data from two different sources in a single analysis.

Marines are inherently amphibious by nature and are expected to operate in aquatic environments. The MCWSTP employs water survival skills of increasing levels of ability designed to reduce fear, raise self-confidence, and develop Marines with the ability to survive in water.

This book makes Marine Corps water survival training and know-how available to anyone that wants to learn it. If you are on boats or around water a lot, the skills learned from the USMC could save your life. You will learn: survival at sea, water rescues, treatment of casualties, avoidance of dangerous marine life, negotiating water obstacles, fording waterways, knot tying. Marine Corps Reference Publication (MCRP) 3-02C, Marine Combat Water Survival, provides Marine Corps combat water survival techniques, procedures, and training standards. This publication also teaches Marines to cross water obstacles and perform water rescues correctly and safely. This publication is the foundation for teaching Marines correct water survival techniques and procedures that are used throughout the Marine combat water survival program (MCWSP). Once an individual or a unit has completed the MCWSP, this publication can be used as a refresher course before water operations.

The book traces the development of printmaking from colonial times through the present and features considerable biographical information about the printmakers themselves.
