The adult human body is around 50-65% water, and it needs fluid in order to function. Muay Thai training is a powerfully effective body dehydrator. Dehydration can result in some nasty effects such as headaches, impaired brain function and reduced endurance. Researchers recommend drinking at least 2 litres (half a gallon) of water per day. Bring a bottle of water when you train and hydrate adequately.

Muay Thai training will typically consist of the following. Warmups. Before taking part in any physical training, Muay Thai trainers will perform short warm ups to prepare the muscles and joints for strenuous activity. They will also stretch the muscles to improve flexibility and decrease the risk of injury. This dynamic Muay Thai warm up is fairly typical

What is Muay Thai? | The ultimate guide to Muay Thai

I suggest lifting 3x a week, doing the 3x program I talk about on my Strength Training for Muay Thai guide. And for cardio stuff, start with 2-3 times a week slow runs rather than HITT (at least initially) for a few months. See how your body responds. If you can do all of this, up the cardio slowly. Reply
