4. Your Pool Power Pak must sit either in an optional filter/pump base, on a patio block, or on any firm surface that slightly elevates the pump off the ground. This keeps water away from the motor and prevents the vents of the Power Pak from becoming blocked, which could cause the motor to overheat.

The power source at this point begins to monitor the changes in voltage over time as it relates to the necking of the molten droplet. The molten metal is still in contact with the molten weld pool. Via the sensing lead, the power source references the observed voltage, and continuously compares the new voltage value to the previous voltage value.
