Population Growth 1

Population Growth How

is population growth

naturally regulated?

Why? The current world

population is estimated

to be over 7 billion. At

present the number of

births annually exceeds

the number of deaths,

which means that the

population is increasing,

and is estimated to reach

File Type PDF

Population

9 billion by 2040. In 1750 the world population was estimated at less than 800 million.
