Gotta read another Lukeman and the last two installments of the Project Series, having just completed The Nostradamus File (Project Series 6). I love that Nick and Selena are two such capable protagonists--lethal even--tho poor Nick is not getting any younger and in this installment begins to have a few issues with Selena (the honeymoon is over).

Former Recon Marine Nick Carter is a man with a dark history of emotional and physical scars. He works for the PROJECT, a covert counter-terrorism unit reporting to the President. Selena Connor is a beautiful, strong and skilled linguist. When her wealthy uncle is murdered by someone looking for an ancient book about the elixir of immortality, she's thrown into Nick's dangerous world. Nick is assigned to protect Selena and help her recover the missing text. It's the beginning of a life and death adventure reaching from San Francisco to Beijing, from Washington to the hidden chambers of Tibet. Someone is determined to take over China and attack America--and Nick and Selena are right in the line of fire. Nostradamus, or Michel de Nostredame, was a physician and astrologer during the time of the Black Death. His most famous book "Les Prophéties," or "the Prophecies," was first published in 1555. Some scholars believe that, in this volume, he predicted a number of world events, such as the rise of Napoleon and the death of Hitler, and that it also predicts the coming of the Antichrist and the end of the world. This volume contains annotations and parallel texts. A modern English translation accompanies the original, Mediaeval French--the language in which Nostradamus originally wrote his prophecies--, helping the reader to understand both the original language and the translation of this critical work of eschatology. This edition also contains fragments of the questionable 11th and 12th centuries.

"Seventy years after Tesla's death, the plans for a death ray fall into the hands of a centuries-old conspiracy bent on world domination. Powerful men will stop at nothing to use the weapon to achieve their goal, even at the risk of nuclear war. Former Recon Marine Nick Carter works for the Project, the shadow hand of the US President. Nick leads the Project team in the field. He has PTSD flashbacks and a psychic quirk that kicks in when bad things are about to happen. Selena Connor is his teammate and lover. She's world-class in ancient languages and accomplished in martial arts, but she'd never used her skills for real until she hooked up with Nick. When someone tries to kill Nick and Selena, it sets them on a twisted path that will test their relationship to the breaking point. Each will be forced to question their commitment to each other and to the violent life they have chosen. From the streets of Prague to the steaming jungles of Mexico, from the ancient hills of Tuscany to the barren plains of Eastern Russia, the story moves with relentless pace toward a final, explosive confrontation"--Adapted from author's web page.

Today, as the world grapples with financial meltdowns, global terrorism, and environmental disasters—as well as the Mayan prediction of the apocalypse on December 21, 2012—his prophecies of doom have assumed heightened relevance. How has The Prophecies outlasted most books from the Renaissance? This edition considers its legacy in terms of the poetics of the quatrains, published here in a brilliant new translation and with introductory material and notes mapping the cultural, political, and historical forces that resonate throughout Nostradamus's epic, giving it its visionary power. Prediction of behavior of the dynamical systems, analysis and modeling of its structure is vitally important problem in engineering, economy and science today. Examples of such systems can be seen in the world around us and of course in almost every scientific discipline including such "exotic" domains like the earth's atmosphere, turbulent fluids, economies (exchange rate and stock markets), population growth, physics (control of plasma), information flow in social networks and its dynamics, chemistry and complex networks. To understand such dynamics and to use it in research or industrial applications, it is important to create its models. For this purpose there is rich spectra of methods, from classical like ARMA models or Box Jenkins method to such modern ones like evolutionary computation, neural networks, fuzzy logic, fractal geometry, deterministic chaos and more. This proceeding book is a collection of the accepted papers to conference Nostradamus that has been held in Ostrava, Czech Republic.
