Equal Opportunity Program, and the Army Sexual Harassment/ Assault Response and Prevention Program. The 30-day advanced publication requirement has been waived because the revision implements previously published law, DoD directives and instructions, and Army directives that need to be consolidated and communicated to the field as soon as possible. This regulation applies to the Regular Army, the Army National Guard/Army National Guard of the United States, and the U.S. Army Reserve, unless otherwise stated. It also applies to all assigned, attached, or operationally controlled U.S. Army Corrections Command personnel, and all Army Corrections System prisoners incarcerated in Army Corrections System facilities. Chapters 6 and 7 and appendix E apply to members of the Army National Guard of the United States when on active duty Title 10 orders, for 30 days or

more. In all other cases, members of the Army National Guard are governed by regulations issued by the Chief, National Guard Bureau consistent with Chief, National Guard Bureau's authorities under 32 USC 110, 10 USC 10503, and DoDD 5105.77. It also applies where stated to Department of the Army Civilians. Portions of this regulation that prescribe specific conduct are punitive, and violations of these provisions may subject offenders to nonjudicial or judicial action under the Uniform Code of Military Justice. The equal opportunity terms found in the glossary are applicable only to uniformed personnel. AR 690-600 and AR 690-12 contains similar terms that are applicable to Department of the Army Civilians.

This authoritative reference examines the causes of--and offers workable solutions to--the widespread problem of musculoskeletal injuries among armed forces personnel. Specific chapters on combat, non-combat, training, and fitness injuries shed necessary light on the nature and scope of the epidemic, including impact on active service members and the resulting quality of life issues in veterans. An overview of these injuries by anatomic region highlights treatment, disability, and prevention issues in military settings. The book also translates the standard public health model for preventing injuries into military context, giving professionals guidelines for developing strategies tailored to the unique strengths and risks of this population. Featured in the coverage:

- The burden of musculoskeletal injuries in the military.
- Traumatic combat injuries.
- Deployment and non-battle injuries.

Doctrine provides a military organization with a common philosophy, a language, a purpose, and unity of effort. Rather than establishing a set of hard and fast rules, the objective of doctrine is to foster initiative and creative thinking. To this end, FM 3-06 discusses major Army operations in an urban environment. This environment, consisting of complex terrain, a concentrated population, and an infrastructure of systems, is an operational environment in which Army forces will operate. In the future, it may be the predominant operational environment. Each urban operation is unique and will differ because of the multitude of combinations presented by the threat, the urban area itself, the major operation of which it may be part (or the focus), and the

fluidity of societal and geopolitical considerations. Therefore, there will always exist an innate tension between Army doctrine, the actual context of the urban operation, and future realities. Commanders must strike the proper balance between maintaining the capability to respond to current threats and preparing for future challenges. This manual provides the analytical tools for evaluating an urban operation to determine if the operation is necessary for overall mission success. It also provides the means to understanding and determining the impacts of the urban environment on military operations and provides information on managing, taking advantage of, and mitigating the effects of those impacts as appropriate. As such, this manual demonstrates how to apply the doctrinal principles in FM 3-0 to this unique environment.

Originally published in 1926, this book forms part of a two-volume work by Sir Henry Head on the subject of aphasia. The work was written in an attempt to analyse and integrate the physical and psychological aspects of the condition, incorporating them both into a general theory regarding linguistic expression. Illustrative figures are included.
